

Professional Development

Putting Lexile® and Quantile® measures to work for you and your students

Each year, more than 35 million Lexile® and Quantile® measures are reported from state and classroom assessments or instructional programs. MetaMetrics® offers a variety of educational services for putting Lexile and Quantile measures to work for you and your students.

Lexile and Quantile Professional Development teaches you what the measures mean and inspires you with the confidence and ability to integrate The Lexile® Framework for Reading and The Quantile® Framework for Mathematics into your school or district. That is why school administrators, teachers, reading and mathematics specialists and other education professionals have turned to Professional Development to learn how they can use Lexile and Quantile measures to inform instruction and improve achievement for all students.

Our interactive workshops demonstrate how you can use Lexile and Quantile measures—and the many tools that leverage them—to:

- achieve your curricular objectives.
- differentiate instruction and manage comprehension.
- set achievable goals and track progress.
- map day-to-day progress to desired results on high-stakes tests.
- communicate with parents about students' progress and goals.
- meet federal and state requirements for student performance and growth.

► Lexile On-Site Workshops

Informational Sessions: The Lexile Framework for Reading – An Introduction

This sixty to ninety minute session is intended as an introduction to the Lexile Framework for Reading and is perfect for meetings, conferences and professional development days. Additionally, this session can be customized to address the needs and questions of parents and publishing/testing partners. **(Available on-site or via a live web session)**

Half-Day Workshop: Foundations of the Lexile Framework for Reading

This half day (3 hours) workshop explores the fundamentals of the Lexile Framework for Reading. This workshop provides an overview of how you can use Lexile measures in schools and classrooms to successfully manage your reading instructional programs and resources.

Full-Day Workshop: Applying the Lexile Framework for Reading

Discover how you can make Lexile measures actionable in the classroom. The full-day workshops provide extensive, interactive training on how to use The Lexile Framework for Reading to maximize student reading growth. Attendees will participate in group activities that provide hands-on learning experiences that will impact day-to-day decisions about reading and instruction. Information and classroom simulation activities will help participants set measurable goals for students, as well as monitor, differentiate and evaluate reading instruction.

Custom Options: Information on the Lexile Framework for Reading

MetaMetrics can customize workshops and informational sessions to meet your unique needs. Whether you need a general overview for a particular audience or specific information tailored to your department or staff, MetaMetrics can tailor a session for you.

Be sure to ask about CEU credits. Your district may recognize Lexile Framework professional development sessions as ongoing professional development.

can put Lexile and
Quantile measures to work
for you and your students.

MetaMetrics, an educational measurement and research organization, develops scientific measures of student achievement that link assessment with targeted instruction to improve learning. The organization's psychometric team developed the widely used Lexile Framework for Reading, El Sistema Lexile® para Leer, the Spanish-language version of the reading framework; The Quantile Framework for Mathematics; and The Lexile® Framework for Writing. In addition to licensing Lexile and Quantile measures to state departments of education, testing and instructional companies and publishers, MetaMetrics offers professional development, resource measurement and customized consulting services.
